Preface

The Social Assistance Statistical Report: 2005 is the second edition of this report released by FPT Directors of Income Support. The report provides provincial-territorial income support (primarily social assistance) statistics and brief descriptions of income support-related programs in the provinces-territories. For further information on the provincial-territorial jurisdictional chapters, please contact the province or territory in question.

We would like to dedicate this edition of the report to our dear colleague from Human Resources and Social Development, Cindy Veness, who played a key role in the preparation of last year's report. Cindy passed away in February 2006.

Chapter 1

Introduction

Overview

The primary focus of this report is programs that are considered as social assistance programs within each province and territory. For these programs, this report provides detailed statistics, such as the number of recipients and cases as of March of each year (time series) and the number of recipients and cases for the following variables where available:

- · Age of Head of Case
- Family Type
- Number of Children on Assistance
- · Reason for Assistance
- Duration on Assistance
- Highest Level of Education Attained (Head of Case)
- · Sources of Income

However, in order to ensure that the presentation of provincial-territorial income support benefits is comprehensive, this report provides an overview of provincial-territorial income support-related programs, such as children's benefits and disability supports programs, and includes basic statistics for these programs. These programs provide income support benefits, but are administered separately from the main provincial-territorial social assistance program (e.g. Assured Income for the Severely Handicapped in Alberta, the Newfoundland and Labrador Child Benefit). Information on some of these programs is currently available to the public through the National Child Benefit and the Early Childhood Development reports.

This report does not include social assistance rates information for the provinces-territories. Social assistance rates information is currently available to the public on most provincial-territorial government websites.

Methodology

Data Sources

The design and delivery of income support programs is the responsibility of each province and territory. Individual jurisdictions develop their own policies, oversee operations, and coordinate services across their province or territory.

Chapter 1 - Introduction

The statistics in this report have been extracted from provincial and territorial data systems developed to meet the administrative and case management needs of their respective jurisdictions. As a result, there are extensive variations in the types of data collected, the manner in which the data is reported, and the definitions and terminology used. For example, when considering the "Reason for Assistance" table, some jurisdictions design and implement income support programs around employability, while others adopt a target group approach (e.g. single parents, persons with disabilities). Therefore, statistics for a given province or territory should not be compared across jurisdictions.

Description of Statistics

When possible, a common framework was used to structure and provide consistency to topics covered in the jurisdictional chapters. The numbers within the tables have been rounded to the nearest 100 except for Yukon, the Northwest Territories and Nunavut where actual numbers have been used. It is important to recognize that the table totals may not add due to rounding and that the rounded numbers in this report may not match other published figures.

Limitations to the Methodology

Due to the complex and constantly changing nature of Canada's income support programs, certain limitations will affect the interpretation and use of the statistics. Therefore, when using the statistics contained in this report, it is important to remember the following caveats:

- Statistics are not available for all provinces-territories in all categories.
- Statistics, exemptions, and benefit rates are provided as of March 31 of each year unless otherwise noted and may be outdated at the time of publication.
- In some provinces and territories, the "Sources of Income" table may include double-counting since cases that have more than one source of income are counted for each source reported.
- In other provinces and territories, in the "Sources of Income" tables, cases
 receiving income from more than one source are counted only once;
 therefore, not all sources of income are counted in all categories.
 However, the total number of cases reporting income sources does not
 include double-counting.
- The "Education of Head" table reflects a specific point in time as it generally represents the level of education attained at the time of application.

Report Layout

This report provides an overview of social assistance in Canada in Chapter 2, which is meant to serve as a general context piece for the detailed provincial-territorial social assistance information that follows. Detailed social assistance information for each province-territory is provided in the chapters that follow. For each province-territory, the following information is included:

- an overview of social assistance programs;
- a description and statistics for income support-related programs; and,
- detailed social assistance statistics.

Chapter 2

Social Assistance in Canada: An Overview

Introduction

Provincial-territorial and municipal social assistance programs, often called Canada's social safety net of last resort, provide financial assistance to cover the cost of basic living requirements and in-kind goods and services for an individual or family when all other financial resources (of that individual or family) have been exhausted.

Jurisdictional Matters

General

Section 92 of the *Constitution Act, 1982* (formerly the *British North America Act, 1867*) entrusts the design, delivery, and administration of social assistance programs to the provinces-territories. As such, the legislation and regulations governing the provision of social assistance in each of the provinces-territories varies by jurisdiction.

Most jurisdictions offer social assistance through a single, unified program at the provincial/territorial level. Only one province, Ontario, operates a two-tier social assistance program jointly with its municipalities. In Ontario, individual municipalities are responsible for the delivery of the Ontario Works program to employable clients. The role of the provincial government is to provide long-term benefits for persons with disabilities through the Ontario Disability Support Program.

First Nations

Indian and Northern Affairs Canada (INAC) provides funding for social assistance programs delivered to First Nations individuals and families who live on-reserve. INAC provides social assistance funding through a block transfer arrangement while individual First Nations communities are responsible for the delivery of social assistance programs. In 2002-2003, 534 First Nations administered their own program (This figure does not include First Nations functioning under self-government arrangements).

Chapter 2 - Social Assistance in Canada: An Overview

Ontario is the only province that cost-shares social assistance programs for First Nations individuals and families directly. The province is then reimbursed by INAC for a percentage of its costs.

Social assistance rates and benefits provided to First Nations individuals and families mirror current provincial-territorial rates and benefits, so as to create a seamless social assistance system for those First Nations recipients and their families who decide to move off-reserve.

Canada Assistance Plan (CAP), Canada Health and Social Transfer (CHST) and the Canada Social Transfer (CST)

CAP

Prior to 1996, the federal government cost-shared social assistance and social services programs with the provinces-territories on a 50-50 basis under the terms of the CAP agreement.

CAP funding was provided to the provinces-territories specifically for the purpose of administering social assistance as well as homes for special care, child welfare, and other welfare services. Established Programs Financing (EPF) block funding was used for health services and post-secondary education.

CAP, the predecessor to the CHST, was created in 1966. It established three national standards to guide provincial-territorial spending on social assistance:

- Assistance must be provided to anyone "in need" as determined by a needs test;
- Applicants could not be denied social assistance because they came from outside the province-territory where they were seeking assistance; and
- Applicants were guaranteed the opportunity to appeal decisions regarding their application for assistance.

CHST

Effective April 1, 1996, the Canada Health and Social Transfer (CHST) replaced the Canada Assistance Plan (CAP) and EPF as the funds transfer vehicle from the federal government to the provinces-territories. The new CHST provided funding for health services, post-secondary education and social assistance and social services in one fixed transfer.

The CHST, in contrast to CAP, was a block transfer. The CHST provided each of the provinces-territories with a fixed amount of money to fund social services.

The introduction of the CHST eliminated all but one of the above requirements under CAP. Within the terms of the CHST, the provinces-territories were required to continue to provide social assistance without a minimum residency requirement.

CST

Effective April 1, 2004, the CHST was restructured to create two separate transfers:

- A Canada Health Transfer (CHT) in support of health; and
- A Canada Social Transfer (CST) in support of post-secondary education, social assistance and social services, including early childhood development. The residency requirement was maintained under the CST.

Eligibility

General

In general, the only eligibility requirement for social assistance is need. Assistance may be granted to any individual or family head that is found, on the basis of need, to be unable to provide adequately for him or herself and any dependants.

Most jurisdictions also require that the applicant have attained the age of majority prior to application.

Residence

A minimum period of residence in a particular jurisdiction is not a condition of eligibility for social assistance. Social assistance applicants are only required to be resident in a particular jurisdiction and provide proof of residence at the time of their application and while receiving benefits.

In all provinces-territories, the following groups of individuals may be eligible for social assistance:

- Canadian citizens;
- Persons granted permanent resident status under the *Immigration and Refugee Protection Act*; and

Chapter 2 - Social Assistance in Canada: An Overview

• Persons who have made a claim for refugee status or have been granted asylum in Canada under the *Immigration and Refugee Protection Act*.

In some provinces-territories, persons subject to deportation or active removal orders are not eligible for social assistance.

Administrative Requirements

In all jurisdictions, social assistance legislation provides for certain basic administrative requirements in order to establish an applicant's initial eligibility. Depending on the province-territory, a social assistance applicant may be required to:

- Submit a duly completed application to the appropriate authority (usually on a prescribed form);
- Provide any evidence as required in support of the application for assistance, such as proof of age, a medical certificate to confirm disability, a separation agreement, bank statements, pay cheque stubs, etc.;
- Meet with a departmental representative (either in person or by telephone) to discuss the financial and social situation of the household (this requirement may be waived in certain cases, such as emergency and short-term assistance);
- Provide the department with written permission to verify any statement made in the application and any supporting documents concerning financial resources or any other circumstances of the household;
- Agree to report any change in circumstances that might affect continuing program eligibility or the amount of assistance to which the household is entitled, such as the death or departure of a family member, or additional income from work or other sources.

Employment Requirements

Provinces-territories actively encourage eligible unemployed able-bodied persons to pursue, accept, and retain any reasonable offer of employment or retraining as an initial and continuing condition of eligibility for social assistance. To this end, many provinces-territories offer employment services and training opportunities in combination with financial assistance. Should a recipient choose not to pursue employment or retraining, they may be subject to penalties ranging from a specified reduction in benefits over a prescribed period of time to the full cancellation of benefits.

Furthermore, to ensure that those individuals and families who successfully leave social assistance for employment are better off working, a number of provinces-territories have introduced earned income or in-work supplements

that are designed to increase the financial return associated with low-wage employment.

Categories of Beneficiaries

Unemployed Able-Bodied Persons

Each provincial-territorial social assistance program includes a number of measures designed to promote the entry or re-entry into the active labour force of unemployed able-bodied persons. These measures may include different exemption levels on assets and income, lower benefit levels to reflect the temporary nature of their reliance on social assistance, and a wide range of employment support services and programs.

Some provinces-territories may require unemployed able-bodied persons, depending on their circumstances, to sign and adhere to an individualized contract that stipulates training and rehabilitation measures to be undertaken in order to regain financial independence. As a general rule, however, assistance may be granted to an unemployed able-bodied person only when the administering authority is satisfied that:

- Any unemployment is due to circumstances beyond the person's control;
- The person is willing to accept employment which he/she is physically capable of handling, or to engage in academic upgrading, re-training or other measures to reach a state of job readiness; and
- The person is making reasonable efforts to secure employment.

Single-Parent Families

In recognition of the financial responsibility of parents with respect to their children, regardless of the family situation, a sole support parent may be required, as a condition of eligibility for social assistance, to either initiate legal proceedings against an absent spouse (or ex-spouse), including common law partners, respecting maintenance payments, or to subrogate that right to the government. Generally, provinces-territories consider single parents as employable – and require them to actively seek and accept reasonable employment – where the parent and dependent child(ren) are physically and mentally healthy and where the dependants have reached a certain age (stipulated in provincial-territorial legislation).

Persons with Disabilities

An applicant requesting assistance because of illness or disability is generally required to submit a medical certificate completed by a licensed physician indicating the level of the impairment and the potential for rehabilitation. In

Chapter 2 - Social Assistance in Canada: An Overview

some jurisdictions, this requirement may be waived – at least in the initial determination of eligibility – where the disability is obvious. In some jurisdictions, persons with disabilities are required to submit evidence of their continuing disability on an annual basis.

All provincial-territorial programs have design features affecting persons with disabilities, including one or more of the following: higher exemption levels on assets and income, higher basic assistance levels, special disability-related allowances, and supplementary health and medical benefits.

Persons with Multiple Barriers to Employment

In recent years, a relatively new category of beneficiaries has emerged. Persons with multiple barriers to employment face a variety of situations and personal circumstances that make it difficult for them to find and maintain employment. Persons with multiple barriers to employment are identified by the fact that they face multiple significant barriers to employment, including substance abuse, childcare or transportation issues, histories of long-term unemployment, and/or low basic skills.

Several jurisdictions use targeted assessment and evaluation tools during the application process to determine the presence of multiple barriers to employment. Persons with multiple barriers to employment require intensive interventions to address their personal circumstances in order to be able to find and maintain employment. In some jurisdictions, they may have higher benefit levels and exemptions to reflect their longer-term reliance on social assistance.

Aged Persons

A person of advanced age may qualify for social assistance notwithstanding eligibility for benefits from federal and provincial-territorial programs for seniors. Financial hardship might be due to some age-related special needs, the number of dependants in the household, or ineligibility for Old Age Security benefits. Provided the applicant meets the legislated eligibility criteria, social assistance may be granted. Most provinces-territories have established higher basic assistance benefit levels or other special considerations for persons beyond their middle years.

Students

Post-secondary students are generally not permitted to receive social assistance while attending university, college, or trade school. Students requiring financial assistance during their study period are expected to contact the appropriate student loan organization (federal, provincial-territorial, or both) to receive financial assistance.

Financial Eligibility

Needs Test

Social assistance is generally granted to persons in need on the basis of a needs test. A needs test takes into account the basic needs and the financial resources available to an individual or family (both assets and income), and the ability of those financial resources to meet their basic needs. This procedure is also known as the "budget deficit method."

Assistance may be granted on the basis of a budget deficit or an insufficient budget surplus. A budget deficit occurs where the amount of available financial resources falls short of the provincial-territorial amount of social assistance for that family type. Where a budget surplus is inadequate to provide for a recurring special need (as often occurs in the presence of a disability) or an unexpected situation, assistance may also be granted.

Assets

Certain exemptions are allowed with respect to actual and potential liquid assets and the property of an individual or family applying for social assistance; any non-exempted assets are deemed to be available for current maintenance of the applicant and his/her dependants.

In most jurisdictions, liquid assets are defined as any assets which are readily convertible into cash including cash on hand, bank accounts, stocks and bonds, or other securities.

Many jurisdictions exempt some portion of the cash value of a life insurance policy from the calculation of liquid assets.

Homeowners applying for social assistance are not required to sell their principal residence and household effects (within reason) as a condition of eligibility. Similarly, applicants are not required to sell their primary vehicle in so long as the value of the vehicle does not exceed an allowable limit. Jurisdictions vary as to whether limits are placed on the value of the primary vehicle.

Provisions regarding the treatment of assets such as Registered Retirement Savings Plans (RRSPs) and Registered Education Savings Plans (RESPs) vary between the provinces-territories.

Assistance may be withheld, reduced, or terminated where an applicant or recipient has disposed of his/her assets in an unreasonable manner in order to qualify for assistance.

Income

Once a household's assets have been determined to fall within the limits allowed, income from all sources is examined in the calculation of entitlement to social assistance. In most jurisdictions, certain types of income are exempt from the calculation of eligibility, including:

- · Canada Child Tax Benefit;
- foster home payments;
- child welfare payments;
- GST/HST rebates;
- insurance settlements;
- compensation payments (HIV, Hepatitis C, Japanese Canadians, Merchant Navy);
- involuntary deductions from pay;
- gifts and inheritances; and
- income from employment held by dependants who are full-time students.

Other types of unearned income are not subject to such exemptions, and as such, are considered available for the immediate maintenance of the applicant and his/her dependants. The net effect of this unearned income is to reduce the amount of social assistance payable dollar-for-dollar. Examples of unearned income include Workers' Compensation benefits and Old Age Security payments.

Partial exemptions for employment income exist in most jurisdictions. These earnings exemptions may be granted as an incentive for the individual or family head to gain or regain financial independence. It is important to note however that in some jurisdictions the earnings exemption provision takes effect only after initial eligibility for social assistance has been established.

In the determination of financial eligibility, authorities in some jurisdictions may include imputed income as part of a household's income even though the household is not actually receiving money from a particular source. Living rent-free in return for janitorial or superintendent services is a common example of imputed income.

Benefits

Basic Assistance

Basic assistance generally covers the cost of food, clothing, personal and household items, and in some provinces-territories, regularly-recurring special needs. There are three basic methods used to calculate the amount of benefits to which an individual or family are entitled. The first method, the pre-

added budget method, combines all non-shelter requirements into a single support allowance. A separate shelter component is then provided. The second method, the itemized budget method, provides a standard allowance for each of the non-shelter and shelter requirements. The sum of the individual items to which the individual or family is entitled then forms the total benefit payable. The third method provides a flat rate of assistance for non-shelter and shelter items based on a household's structure and the program in which it is participating.

Shelter requirements are usually paid at actual cost up to a specified maximum. Variables affecting the amount of shelter allowance payable include the number of beneficiaries in any given household, the type of living arrangement (room and board, market rental housing, living with a relative), and the cost of fuel and utilities. In some jurisdictions, the shelter amount varies depending on the location and relative remoteness of the area in question. In such jurisdictions, a scale of benefits based on location indicates the maximum amount of social assistance payable for shelter and utilities. The amount of the utility benefit to which an individual or family is entitled may also vary based on the season.

Special Needs Assistance

A variety of special needs assistance is also available on an individual basis to clients of the social assistance system. Generally, special needs assistance provides items, services, or allowances related to age, disability, employment, education, training, and other special circumstances. Examples of special needs assistance include transportation allowances, employment-related allowances, childcare subsidies, drug and medical services, as well as furniture replacement, minor home repair allowances, special diet allowances, school supply allowances, and funeral services. The range of available special needs assistance varies widely by jurisdiction. It is important to note that the provision of items of special need is on a case-by-case basis in accordance with the applicable policies and guidelines. In other words, a social assistance client is not automatically guaranteed to receive an item of special need that they request. Such requests are subject to eligibility criteria and the discretion of social services personnel to assess individual circumstances.

Transitional Assistance

In an effort to increase labour market attachment and reduce reliance on social assistance, provincial-territorial governments have attempted to lessen the financial impact of the transition from social assistance to employment. Child-care and transportation allowances have been increased in some jurisdictions to facilitate the participation of social assistance recipients in employment and retraining activities. Extended drug cards and

supplementary health benefits, valid after leaving social assistance (subject to renewal) have further lessened the financial impact of accepting employment.

Indexation

Each jurisdiction is responsible for the indexation of its benefits. While most jurisdictions revise their rates on an "ad hoc" basis, Quebec annually indexes its benefits for those with significant limitation to employment. In addition, through the Government Action Plan to combat poverty and social exclusion, the Quebec government commits to partially indexed financial assistance benefits for those able to work to a level equivalent to 50% of the indexing rate applied for the personal taxation system.

Administration

Referral to Other Government Programs

In some jurisdictions, the social assistance application process begins with a review of the applicant's circumstances to determine if social assistance is the most appropriate intervention for them. For this purpose, many jurisdictions have established client contact centres in order to pre-screen potential applicants. If it is determined that another government program may be more suitable given their circumstances, applicants are referred to that program and their application for social assistance is discontinued.

Method of Payment

Social assistance benefits can be paid in a variety of ways – by cash, payroll or manual cheque issue, direct deposit to a client's banking institution, voucher or authorization to purchase, or direct payment to a third party vendor or supplier.

Case Review

As a condition of continuing eligibility for assistance, beneficiaries must report immediately any change in the circumstances of their household that would affect its entitlement to assistance. In addition, some jurisdictions require that social assistance cases be reviewed regularly, usually every year in the case of long-term clients, and more frequently for short-term clients, such as unemployed able-bodied persons. Reviews are either conducted by a caseworker in person, or by telephone, or through the mail via a declaration that is appended directly to the social assistance cheque each month.

Recoveries and Reimbursement

Every province-territory has established procedures and policies concerning the recovery of social assistance granted to a person who was not entitled because of a change in household income or other circumstances, accidental or wilful representation, or fraud. In addition, certain forms of assistance granted by a province-territory may be conditional upon a formal agreement signed by the recipient to reimburse the government for such assistance.

Appeals

In every province-territory, an applicant or recipient is entitled to file a request for reconsideration or appeal where he/she is dissatisfied with a decision affecting his entitlement to social assistance. Some provinces-territories have established limits on issues that may be formally appealed, while others allow an individual to question any determination bearing on his/her case. Appeal systems may consist of a provincial-territorial appeals board made up of several members appointed by the minister responsible for social services or a local review committee of a few community members, or both. Most provinces-territories have adopted a two-step appeals process in which social services personnel first conduct an internal administrative review. The decision rendered by the administrative review is then subject to appeal to a formal Appeals Board consisting of appointed members.

Children's Benefits

In some provinces and territories, child benefit programs provide benefits to all low-income families with children, whether they are working or on social assistance. Some programs were in existence when the National Child Benefit program was established, and others were implemented afterwards.

The National Child Benefit (NCB) is a joint initiative of Canada's federal, provincial and territorial governments¹, which includes a First Nations component. The goals of the NCB are to prevent and reduce the depth of child poverty, promote attachment to the labour force by ensuring that families are always better off working, and reduce overlap and duplication of programs and simplify administration.

The NCB is a component of the Canada Child Tax Benefit (CCTB). The CCTB provides a base benefit to all low- and middle-income families with

¹ The Government of Quebec has stated that it agrees with the basic principles of the NCB. Quebec chose not to participate in the NCB because it wanted to assume control over income support for children in Quebec; however, it has adopted a similar approach to the NCB. The reference to the NCB as a joint federal-provincial-territorial initiative does not include Quebec.

Chapter 2 - Social Assistance in Canada: An Overview

children. The NCB Supplement is provided to low-income families with children, whether the parents are working or receiving social assistance. Both the base benefit of the CCTB and the NCB Supplement are paid on a monthly basis and are income tested using information provided when a parent files an income tax return.

Provinces and territories have the flexibility to adjust social assistance or child benefit payments by an amount equivalent to the NCB Supplement. First Nations follow the approach of the relevant province or territory. Funds resulting from such adjustments support new or enhanced programs benefiting low-income families with children and are referred to as NCB Reinvestment Funds. Provinces, territories and First Nations may also invest additional funds in benefits and services consistent with the objectives of the NCB. These funds are known as NCB Investment Funds.

Since the implementation of the NCB in the summer of 1998, distinct approaches have evolved regarding the replacement of social assistance benefits for children through the NCB.

In the **social assistance offset approach**, the NCB Supplement is treated as an unearned income charged against social assistance. This approach is used in Prince Edward Island, Ontario,² Yukon, Northwest Territories and Nunavut. In Alberta³, the social assistance rate is reduced by the maximum NCB Supplement. Since 2001, in Prince Edward Island, any increases in the NCB Supplement have been used to fund an increase in the Healthy Child Allowance, which is a social assistance benefit.

Some jurisdictions have chosen to restructure their social assistance system to pay children's benefits through a separate income-tested child benefit program that is integrated with the CCTB program. Under this approach, which is known as the **integrated child benefit approach with adjustment**, increases in the NCB Supplement are offset in full or in part against the provincial child benefit. Saskatchewan and British Columbia have adopted this approach.

Other jurisdictions chose to restructure their social assistance system to provide children's benefits through a separate income-tested program. In these cases, however, there was no offset of the NCB Supplement against child benefits. This approach, which is known as the **integrated child benefit**

²The 2005 Ontario Budget announced that social assistance payments would not be reduced by the amount of the July 2004 or July 2005 federal increases to the NCBS for another year.

³ In 2003, Alberta enhanced the mix of income and in-kind benefits and services to families receiving assistance through the Supports for Independence program by flowing through the full increase of the NCB Supplement. Alberta extended the flow-through of NCB Supplement increases again in 2004 and in 2005 under the new Alberta Works - Income Support program.

Chapter 2 - Social Assistance in Canada: An Overview

approach without adjustment, has been adopted by Newfoundland and Labrador and Nova Scotia.

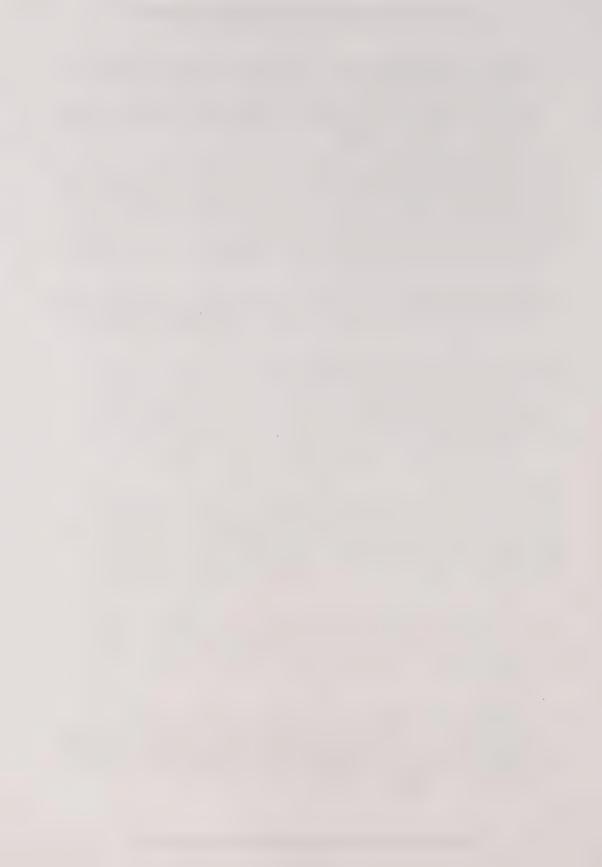

Two jurisdictions, New Brunswick and Manitoba⁴, do not adjust social assistance benefits for children and, instead, flow through the NCB Supplement directly to recipients.

In 2004-2005, provinces and territories provided NCB programs and services in child-care and day-care initiatives, child benefits and earned income supplements, early childhood services and children-at-risk services, supplementary health benefits, youth initiatives, and other NCB programs, benefits and services. First Nations reinvestments covered a broader range of programs in five key areas: home-to-work transition, cultural enrichment, child nutrition, childcare, and support to parents.

Additional information on the NCB is available in annual progress reports, which are available on the NCB web site at: www.nationalchildbenefit.ca.

Social Assistance Statistical Report: 2005

⁴ Effective July 2000, Manitoba discontinued recovering increases in the NCB Supplement for families receiving income assistance. Effective July 2001, Manitoba stopped recovering the NCB Supplement for children age six or under. Effective January 2003, Manitoba stopped recovering the NCB Supplement for children age seven to eleven; and effective January 2004, it stopped recovering the NCB Supplement for children age 12 to 17 years.

Chapter 3 - Newfoundland and Labrador

Income Support

PROGRAM DESCRIPTION

Overview

In Newfoundland and Labrador, the provincial social assistance program is known as Income Support. The *Income and Employment Support Act* and the Income and Employment Support Regulations govern Newfoundland and Labrador's social assistance program.

Income Support provides basic benefits to adults only. Children's basic benefits are provided through the Newfoundland and Labrador Child Benefit (see p. 20).

Service Delivery

The Department of Human Resources, Labour, and Employment is responsible for the delivery of the Income Support program to adults within the province.

Eligibility

General

In order to be eligible for the Income Support program, applicants must meet the general eligibility requirements outlined in the "Social Assistance Overview" in this report.

Liquid Assets

At the time of application, applicants' liquid assets may not exceed the following allowable limits.

Newf	oundland and Labrador - Liquid March 2005	Asset Exemptions
	Clients without Disabilities	Clients with Disabilities a
Single	\$500	\$3,000
Family	\$1,500	\$5,500

Earnings Exemptions

Once an application for assistance has been approved, Income Support program clients are eligible for the following monthly exemptions on earned income:

Newfoundland and Labrador - Earnings Exemptions March 2005				
Single	\$75	\$95		
Family	\$150	\$190		
a. These clients m	ust require supportive services.			

Benefits

Basic assistance consists of individual/family benefits and a shelter allowance. Individual/family benefits covers the cost of food, clothing, and utilities for adults only. Maximum individual/family benefits rates are based on the number of adults in the household. Maximum shelter allowance rates are based on the number of persons in the household (including children) and the type of accommodation.

Newfoundland and Labrador provides clients that leave social assistance for employment with an extended drug card that is valid for six months.

Children's basic benefits are paid through the Newfoundland and Labrador Child Benefit.

Newfoundland and Labrador Child Benefit

The Newfoundland and Labrador Child Benefit (NLCB) is a non-taxable amount paid monthly to help low-income families with the cost of raising children under the age of 18 years. The creation of the Newfoundland and Labrador Child Benefit, in July 1999, effectively removed children's benefits from the social assistance system.

The Canada Revenue Agency delivers the NLCB as an integrated payment with the CCTB and the NCB supplement. The NLCB rates are based on net income and number of children. For instance, maximum NLCB benefits are paid to those families whose income is less than \$17,397 per year. Families whose annual income falls between \$17,397 and \$22,397 per year (depending on the number of children) may be eligible for partial NLCB benefits.

Effective July 2004, in addition to the National Child Benefit Supplement, families with one child receive \$234 per year. Families are eligible to receive \$321 per year for their second child, \$345 per year for their third child, and \$370 per year for each additional child.

Newfoundland and Labrador - Income Support

a. For 2004 and 2005, total cases and recipients in the above table differ from the totals shown in the detailed tables that follow. The total caseload for March 2004 and March 2005 includes a small number of cases paid through other means. Additional differences are due to slight variations in the selection criterion used to derive the official count and the criterion used to produce data extracts for subsequent detailed analysis.

Cases by Reason for Assistance

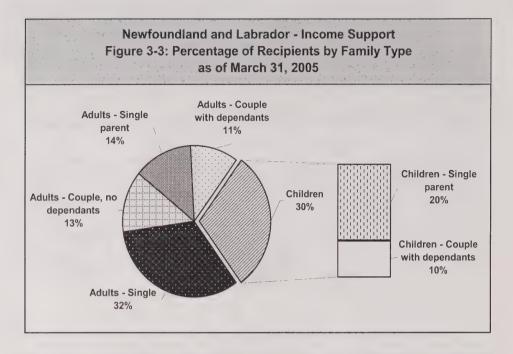

Newfoundland and Labrador - Income Support Table 3-2: Number and Percentage of Cases by Reason for Assistance as of March 31, 2005				
Reason for Assistance	2005	%		
Employed	700	3%		
Unemployed	10,500	38%		
Short term disability	400	1%

Chapter 4 - Prince Edward Island

Social Assistance

PROGRAM DESCRIPTION

Overview

In Prince Edward Island, the provincial social assistance program is known as Social Assistance (SA). The *Social Assistance Act* and the Social Assistance Regulations govern Prince Edward Island's Social Assistance program.

Social Assistance provides basic benefits to both adults and children.

Disability supports are provided through Prince Edward Island's Disability Support Program (see p. 30).

Service Delivery

The Department of Social Services and Seniors is responsible for the delivery of the Social Assistance program to adults and children within the province.

Eligibility

General

In order to be eligible for the Social Assistance program, applicants must meet the general eligibility requirements outlined in the "Social Assistance Overview" in this report.

Liquid Assets

At the time of application, applicants' liquid assets may not exceed the following allowable limits.

Short-Term Assistance

Single persons who are expected to receive benefits for less than four months (short-term assistance) and/or who are seasonally unemployed are entitled to retain \$50.

Long-Term Assistance⁵

Prince Edward Island - Long-Term Assistance Liquid Asset Exemptions March 2005				
	Clients without Disabilities	Clients with Disabilities		
Single	\$200	\$900		
Single-Parent Family	\$900 plus \$300 per dependant to a maximum of \$2,400.	n/a		
Childless Couple	\$1,200	\$1,800		
Two-Parent Family	\$1,200 plus \$300 per dependant to a maximum of \$2,400.	\$1,800 plus \$300 per dependant to a maximum of \$2,400.		

Earnings Exemptions

Social Assistance program clients are eligible for the following monthly exemptions on earned income:

	Prince Edward Island - Earnings Exemptions
	March 2005
Single	\$ 75 plus 10% of the excess
Family	\$125 plus 10% of the excess

Benefits

Basic assistance consists of a basic allowance and a shelter allowance. The basic allowance covers the cost of food, clothing, utilities, and personal and household items. Maximum basic allowance rates are based on the number of persons in the household and the age of the children. Maximum shelter allowance rates are based on the number of persons in the household (including children) and the type of living arrangements.

Disability Support Program

In October 2001, Prince Edward Island launched the Prince Edward Island Disability Support Program. Designed to meet the unique needs of persons with disabilities, the Disability Support Program offers both financial and case planning assistance to eligible individuals. It is comprised of three

⁵ Long-Term Assistance is for those clients expected to receive benefits for more than four months.

Chapter 4 - Prince Edward Island - Social Assistance

components: Adult Disability Supports, Child Disability Supports, and Employment and Vocational Supports.

The Disability Support Program is available to individuals under 65 years of age who have a physical, neurological, or intellectual disability that limits their ability to perform activities necessary for their independence and well-being.

Individuals and families receiving benefits through the Disability Support Program must assume a portion of the cost associated with the provision of services. The amount of this contribution is based on the individual or family's ability to contribute.

Persons with disabilities continue to receive financial assistance through the Social Assistance program, but now receive targeted disability-related supports through the Disability Support Program. Individuals and families receiving support through the Disability Support Program are ineligible for certain benefits provided by the Social Assistance program.

Chapter 5 - Nova Scotia

Employment Support and Income Assistance

PROGRAM DESCRIPTION

Overview

In Nova Scotia, the provincial social assistance program is known as Employment Support and Income Assistance (ESIA). The *Employment Support and Income Assistance Act* and the Employment Support and Income Assistance Regulations govern Nova Scotia's Employment Support and Income Assistance program.

The Employment Support and Income Assistance program provides financial assistance and employment supports to help people maximize their self-sufficiency by increasing their employability and their independence.

Children's basic benefits are provided through the Nova Scotia Child Benefit (see p. 40).

Service Delivery

The Department of Community Services is responsible for the delivery of the Employment Support and Income Assistance program to adults within the province.

Eligibility

General

In order to be eligible for the Employment Support and Income Assistance program, applicants must meet the general eligibility requirements outlined in the "Social Assistance Overview" in this report.

Liquid Assets

At the time of application, applicants' liquid assets may not exceed the following allowable limits.

Nova Scotia - Liquid Asset Exemptions March 2005		
	Clients without Disabilities	Clients with Disabilities
Single	\$500	\$500
Family	\$1,000	\$1,000

Earnings Exemptions

When determining initial eligibility for Employment Support and Income Assistance, earned income is considered completely in determination of eligibility. To determine ongoing eligibility, clients are eligible for the following monthly exemptions on earned income:

^	Nova Scotia - Earnings I March 2005	Exemptions
	Clients without Disabilities	Clients with Disabilities a
Single	30% of net wages	\$150 plus 30% of the excess
Family	30% of net wages	not applicable

Benefits

Basic assistance consists of a personal allowance and a shelter allowance. The personal allowance covers the cost of food, clothing, and miscellaneous essentials for adults in the family. The shelter allowance includes the actual amount for rent/mortgage, fuel and utilities, up to the allowed maximum. Maximum shelter allowance rates are based on the number of persons in the household (including children) and the type of accommodation.

Nova Scotia provides extended drug coverage for twelve months to clients that leave social assistance for employment.

Children's basic benefits are paid through the Nova Scotia Child Benefit.

Nova Scotia Child Benefit

The Nova Scotia Child Benefit (NSCB) is a non-taxable amount paid monthly to help low-income families with the cost of raising children under the age of 18 years. The implementation of the *Employment Support and Income Assistance Act* and Employment Support and Income Assistance Regulations in August 2001 removed children's benefits from the social assistance system.

Chapter 5 - Nova Scotia - Employment Support and Income Assistance

The Canada Revenue Agency delivers the NSCB as an integrated payment with the CCTB and the NCB Supplement. The NSCB rates are based on net income and number of children. For instance, maximum NSCB benefits are paid to those families whose income is less than \$15,999 per year, while families whose annual income falls between \$15,999 and \$20,921 per year (depending on the number of children) are eligible for partial NSCB benefits.

Effective July 2001, in addition to the National Child Benefit Supplement, families with one child may be entitled to receive a NSCB benefit of up to \$445 per year. Families may be entitled to receive \$645 per year for their second child, and \$720 per year for their third and each additional child.

There continues to be a decline in the number of families receiving the Nova Scotia Child Benefit. The changing demographics and improved economy in the Province of Nova Scotia may be contributing to this decline.

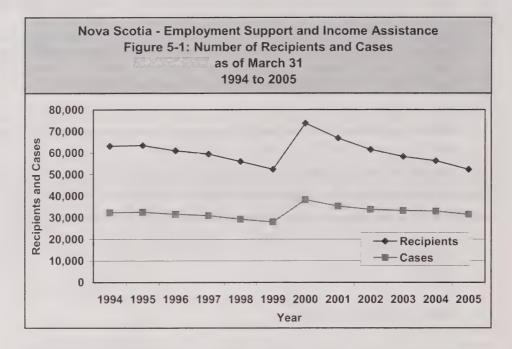

Nova Scotia Child Benefit Estimated Number of Recipients 1999-2000 to 2004-2005 1999-2000 2000-2001 2001-2002 2002-2003 2003-2004 2004-200

Chapter 6 - New Brunswick

Social Assistance

PROGRAM DESCRIPTION

Overview

In New Brunswick, the provincial social assistance program is known as Social Assistance (SA). The *Family Income Security Act* and the Family Income Security Regulations govern New Brunswick's Social Assistance program.

Social Assistance provides basic benefits to both adults and children.

Service Delivery

The Department of Family and Community Services is responsible for the delivery of the Social Assistance program to adults and children within the province.

Eligibility

General

In order to be eligible for the Social Assistance program, applicants must meet the general eligibility requirements outlined in the "Social Assistance Overview" in this report.

Liquid Assets

At the time of application, applicants' liquid assets may not exceed the following allowable limits.

New Brunswick - Liquid Asset Exemptions March 2005				
	Clients without Disabilities	Clients with Disabilities		
Single	\$1,000	\$3,000		
Single-Parent Family	\$2,000	\$3,000 for each person with a disability plus \$1,000 for each non-disabled person up to a maximum of \$4,000.		
Childless Couple	\$2,000	\$3,000 for each person with a disability plus \$1,000 for each non-disabled person up to a maximum of \$4,000.		
Two-Parent Family	\$2,000	\$3,000 for each person with a disability plus \$1,000 for each non-disabled person up to a maximum of \$4,000.		

Earnings Exemptions

Different levels of earning exemptions are in effect for each of the three programs in place: Transitional Assistance Program, Extended Benefits Program, and Interim Assistance Program. For more information on these social assistance programs, please refer to page 51. Once an application for assistance has been approved, program clients are eligible for the following monthly exemptions on earned income:

New Brunswick - Earnings Exemptions March 2005					
Transitional Assistance Extended Benefits Interim Assistance Program Program Program					
Single	\$150	\$150	\$200		
Family	\$200	\$200	\$250		

There is also the Extended Wage Exemption (EWE) available. The EWE is a benefit structure separate from the usual earnings exemption (provided above). The amount of the EWE is changed according to three different time frames within the two-year duration of the benefit. The first two time frames are six months in duration each, and allow clients the option of having a percentage of their salary exempted; which results in a higher exemption than the usual earnings exemption. In months 13 through 24, the earnings exemption amount will revert back to the appropriate maximum flat rate amount; that is the usual earnings exemption.

Benefits

Basic assistance, also known as the basic unit rate, covers the cost of food, clothing, shelter, routine transportation, fuel and utilities, as well as personal and household items. Maximum basic assistance rates are based on the three rate programs involved (see below) and the number of persons in the household.

The Social Assistance program has three rate programs: Transitional Assistance Program (TAP), Extended Benefits Program (EBP), and Interim Assistance Program (INT).

The **Transitional Assistance** provides financial assistance to individuals and families who have a variety of intermittent foreseeable needs. This is a category of financial assistance for individuals and families who have the potential to achieve self-sufficiency once their barriers to employment are addressed.

The **Extended Benefits Program** provides financial assistance to individuals and families who are certified by the Medical Advisory Board as blind, deaf, or disabled. This is a category of financial assistance for those clients who, because of their disability, have long-term predictable needs.

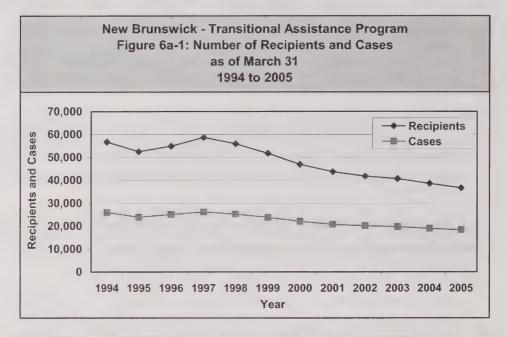

The **Interim Assistance** provides short-term assistance to individuals and families who are in need, yet who are expected to attain self-sufficiency in a relatively short period of time. Benefits and services provided to these clients are generally temporary in nature.

Chapter 7- Quebec

Employment Assistance

PROGRAM DESCRIPTION

Overview

In Quebec, the provincial social assistance program is known as Employment Assistance (EA). The *Act respecting income support, employment assistance and social solidarity*⁶ and the Regulations respecting income support govern Quebec's Employment Assistance program.

Employment Assistance provides basic benefits to adults only. Between September 1997 and January 2005, children's basic benefits were provided through the Quebec Family Allowance. Since January 2005, children's basic benefits have been provided through the Child Assistance Measure.

Service Delivery

The Department of Employment and Social Solidarity is responsible for the delivery of the Employment Assistance program to adults within the province.

Eligibility

General

In order to be eligible for the Employment Assistance program, applicants must meet the general eligibility requirements outlined in the "Social Assistance Overview" in this report.

Liquid Assets

At the time of application, applicants' liquid assets may not exceed the following allowable limits:

⁶ The Quebec National Assembly adopted the *Individual and Family Assistance Act* on June 16, 2005. This Act will replace the *Act respecting income support, employment assistance and social solidarity* when this Regulation of application will be in effect. It created the new Social Assistance and Social Solidarity programs. The Child Assistance Measure and a Work Premium program were created by the *Taxation Act*.

Chapter 7 - Quebec - Employment Assistance

Quebec - Liquid Asset Exemptions at Application March 2005				
Number of Adults Number of Children Liquid Assets				
1	0	\$816		
1	1	\$1,166		
1	2	\$1,382		
2	0	\$1,212		
2	1	\$1,445		
2	2	\$1,661		

Once an application for assistance has been approved, clients' liquid assets may not exceed the following allowable limits:

Quebec - Liquid Asset Exemptions after Enrolment March 2005			
	Clients with no limitations to employment	Clients with limitations to employment	
Single	\$1,500	\$2,500	
Family	\$2,500	\$5,000	

Earnings Exemptions

Once an application for assistance has been approved, Employment Assistance program clients are eligible for the following monthly exemptions on earned income:

Quebec - Earnings Exemptions March 2005				
	Clients with severe limitations to employment			
Single	\$200	\$200	\$100	
Single-parent family	\$200	\$200	\$100	
Two-parent family	\$300	\$300	\$100	

Benefits

Financial assistance consists of a basic benefit, paid monthly, which may be supplemented by an allowance for individuals who are facing temporary or severe employment limitations. The basic benefit covers the cost of food and

Chapter 7 - Quebec - Employment Assistance

clothing, shelter, as well as personal and household items for adults only. Maximum basic benefit rates are based on family composition.

In order to receive a benefit for temporary limitations to employment, an applicant must be 55 years of age or older, unable to participate in the labour market for health reasons for a period of no more than 12 months, be caring for a child who does not yet attend school (5 years of age or under) or is disabled, or be pregnant. In order to receive the allowance for severe employment limitations, the person's physical or mental state must be significantly altered or deficient for what will most likely be a permanent or indeterminate period of time.

The program also offers advance payment of the tax credit for the Quebec sales tax (TVQ).

Quebec Family Allowance

The Quebec Family Allowance was a non-taxable amount paid monthly to help low-income families with the cost of raising children under 18 years of age. The creation of the Quebec Family Allowance in September 1997 effectively had removed children's benefits from the social assistance system. For the period covered in this report, the Quebec Family Allowance was in effect until December 31, 2004.

The Régie des rentes du Québec was responsible for administering the Quebec Family Allowance.

Effective August 2004, families were entitled to receive a Family Allowance in the amount of \$625 per year per child. Single-parent families could receive an additional family supplement of \$1,300 per year. An additional amount of \$1,431 was provided for each child with disabilities.

Maximum Family Allowance benefits were paid to single-parent families with one child whose income was less than \$20,603 per year. Single-parent families with one child whose annual income fell between \$20,603 and \$51,600 per year were eligible for partial Family Allowance benefits.

Maximum Family Allowance benefits were paid to two-parent families with one child whose income was less than \$24,005 per year. Two-parent families with one child whose annual income fell between \$24,005 and \$51,600 per year were eligible for partial Family Allowance benefits.

Chapter 7 - Quebec - Employment Assistance

Quebec Family Allowance Estimated Number of Recipients 1997 - 2004						
	1997 1998 1999 2000					
Families	680,017	660,939	629,843	587,005		
Children	1,200,262	1,179,947 1,126,026	1,047,794			
2001 2002 2003 2004 ^a						
Families	553,710	537,368	509,361	496,040		
Children	988,587	957,214	907,059	881,149		
a. These numbers are for QFA recipients from April 1, 2004 to December 31, 2004.						

Child Assistance Measure

In 2004-2005 Budget Speech, the Quebec government announced a new Child Assistance measure to increase support for families. The Child Assistance Measure came into force on January 1, 2005, to cover the basic needs of dependent children under 18 years old. Child Assistance replaces and improves three measures: the Family Allowance, the non-refundable tax credit for dependent children and tax reduction for families. This measure provides more generous assistance than the Family Allowance, particularly to low-income families.

The amount of the Child Assistance Measure varies. Its amount is based on the following factors: net family income, the number of dependent children under the age of 18, and the type of family (single-parent or two-parent).

The maximum amounts paid are as follows: for a family with one child: \$2,049 per year; for a family with two children: \$3,073; for a family with three children: \$4,097; and for a family with four children: \$5,633.

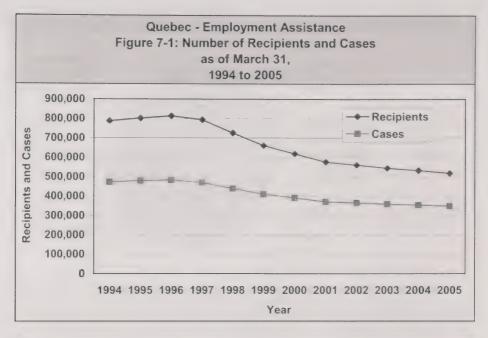

For each additional child, an amount of \$1,536 is added to the maximum of \$5,633. Single-parent families are entitled to a supplement of up to \$717, which is added to the basic Child Assistance Measure amount.

⁷ In Quebec, statistics are reported under the heading of "menages prestataire", i.e. household. As the concept is the same as the one used for "cases" in other jurisdictions, the latter is used throughout the English version as an equivalent.

Cases by Type of Benefit

Quebec - Employment Assistance
Table 7-2: Number and Percentage of Cases
by Type of Benefits,
as of March 31, 2005

Type de prestations	2005	%
Basic benefit only ^a	134,400	39%
Basic benefit (housed beneficiaries) b	3,700	1%
Allowance - severe constraints ^c	115,200	33%
Allowance - temporary constraints d	84,700	24%
Combined allowance (severe) e	6,500	2%
Combined allowance (temporary)	4,200	1%
Total	348,700	100%

a. "Basic benefit ony": Basic amount applicable to a single adult or a couple.

b. "Basic benefit (housed beneficiaries)": Basic amount applicable to a housed adult admitted to a home-care centre, reception centre, general hospital, rehabilitation centre, as well as to a former inmate housed in a recognized institution for the purpose of his/her social rehabilitation.

The following benefits include an amount added to the basic benefit:

c. "Allowance - severe constraints ": Where a single adult/adult member of the family is subject to severe employment constraints due to a significant physical or mental impairment, and is unable to support him/herself

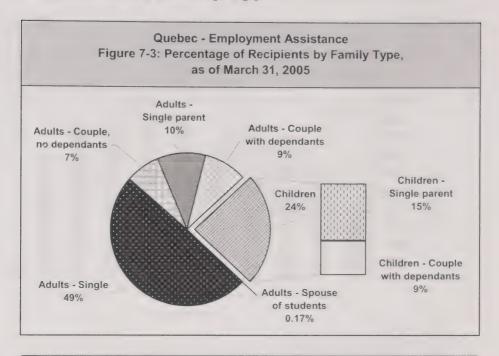

d. "Allowance - temporary constraints": Where a single adult/adult member of the family is subject to temporary employment constraints.

e. "Combined allowance (severe)": Where at least one of the two adults in the household is subject to a severe employment constraint and the other adult to a severe or temporary employment constraint.

f. "Combined allowance (temporary)": Where both adults in the household are subject to temporary employment constraints.

Note: Totals may not add due to rounding.

Recipients by Family Type

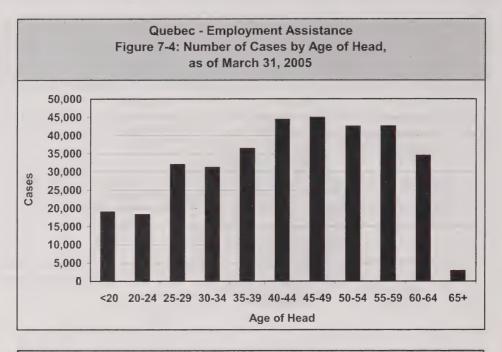

Quebec - Employment Assistance
Table 7-3: Number and Percentage of Recipients by Family Type,
as of March 31, 2005

Family Type	2005	%

Chapter 8 - Ontario

A - Ontario Works

PROGRAM DESCRIPTION

Overview

In Ontario, the provincial social assistance program is known as Ontario Works. The *Ontario Works Act*, 1997, and the Ontario Works Regulations govern the Ontario Works program.

Ontario Works provides basic benefits to both adults and children.

Social assistance for persons with severe disabilities is provided through the Ontario Disability Support Program (see p. 83).

Service Delivery

Under Ontario Works legislation, delivery agents are designated for a geographical area. Ontario Works delivery agents include 47 Consolidated Municipal Service Managers (CMSMs) and District Social Services Administration Boards (DSSABs) and 109 First Nations who deliver the program across the province.

Eligibility

General

In order to be eligible for Ontario Works, applicants must meet the general eligibility requirements outlined in the "Social Assistance Overview" in this report.

Liquid Assets

At the time of application for Ontario Works, applicants' liquid assets may not exceed the following allowable limits.

Chapter 8 - Ontario - Ontario Works

Ontario - Ontario Works - Liquid Asset Exemptions March 2005				
Single	\$536			
Single-Parent Family	\$1,487 plus \$500 for each additional dependant			
Childless Couple	\$929			
Two-Parent Family	\$1,562 plus \$500 for each additional dependant			

Earnings Exemptions

Once an application for assistance has been approved, Ontario Works clients are eligible for the following monthly exemptions on earned income:

Ontario - Ontario Works - Earnings Exemptions March 2005					
Number of Adults	Number of Children	Earnings Exemptions			
1	0	\$143			
1	1	\$275			
1	2	\$321			
1	3	\$372			
2	0	\$249			
2	1	\$295			
2	2	\$346			
2	3	\$397			

Benefits

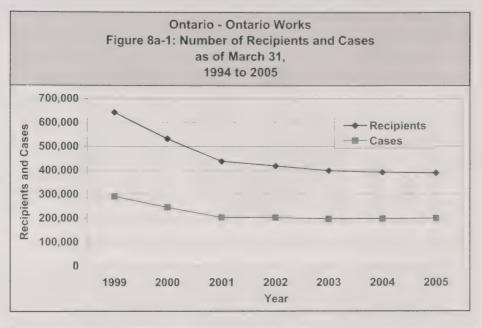

Basic assistance consists of a basic needs allowance and a shelter allowance. The basic needs allowance covers the cost of food, clothing, and personal needs. Maximum basic needs allowance rates are based on the presence of a spouse, the number of members in the unit, and the ages of the children in the unit. Maximum shelter allowance rates are based on the number of persons (including children) in the unit.

More Information

For more information, please consult the Ontario Ministry of Community and Social Services website at: www.cfcs.gov.on.ca/CFCS/en/default.htm.

B - Ontario Disability Support Program

PROGRAM DESCRIPTION

Overview

In Ontario, the provincial social assistance program for persons with disabilities is known as the Ontario Disability Support Program (ODSP). The Ontario Disability Support Program Act and its Regulations govern the program.

Ontario Disability Support Program provides income support and benefits, including health-related benefits, to people with disabilities and their families who are in financial need. It also provides employment supports on a voluntary basis.

Service Delivery

The Ministry of Community and Social Services is responsible for the delivery of Ontario Disability Support Program through a network of nine regional offices located throughout the province.

Eligibility

General

In order to be eligible for the Ontario Disability Support Program, applicants must meet the general eligibility requirements outlined in the "Social Assistance Overview" in this report.

Liquid Assets

At the time of application for the Ontario Disability Support Program, applicants' liquid assets may not exceed the following allowable limits.

Ontario - Ontario Disability Support Program Liquid Asset Exemptions March 2005		
Single	\$5,000	
Couple	\$7,500 plus \$500 for each additional dependant	

Earnings Exemptions

Once an application for assistance has been approved, Ontario Disability Support Program clients are eligible for the following monthly exemptions on earned income:

	Ontario - Ontario Disability Support Program
E A CA	Earnings Exemptions
	3 3 1 2 2 2 2 March 2005 3 7 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2
	Clients with Disabilities
Single	\$160 plus 25% of the net remainder
Family	\$235 plus 25% of the net remainder

The Ontario Disability Support Program earnings exemptions are applied to net employment earnings for the purpose of reducing chargeable income in order to encourage recipients to pursue employment as a means of self-sufficiency.

Benefits

Services provided through the Ontario Disability Support Program can be categorized as either income support (basic assistance) or employment supports.

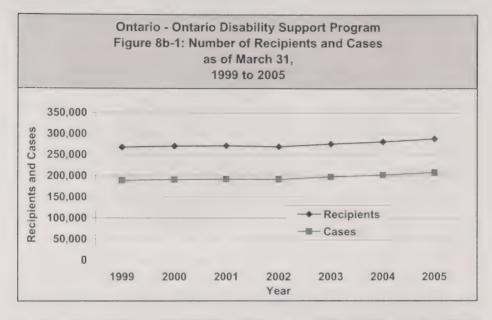

Basic assistance consists of a basic needs amount and a shelter allowance. The basic needs cover the cost of food, clothing, transportation, personal and non-shelter needs. Maximum basic needs rates are based on the number of members in the benefit unit, the ages of the children in the unit, and the unit's geographical location. Maximum shelter allowance rates are based on the number of people in the benefit unit.

More Information

For more information, please consult the Ontario Ministry of Community and Social Services website at: www.mcss.gov.on.ca/CFCS/en/default.htm.

Chapter 9 - Manitoba

Employment and Income Assistance

PROGRAM DESCRIPTION

Overview

In Manitoba, the provincial social assistance program is known as Employment and Income Assistance (EIA). The *Employment and Income Assistance Act* and its Regulation govern Manitoba's Employment and Income Assistance program.

Employment and Income Assistance provides basic benefits to both adults and children.

Service Delivery

The Department of Family Services and Housing is responsible for the delivery of the Employment and Income Assistance program to adults and children within the province.

Eligibility

General

In order to be eligible for the Employment and Income Assistance program, applicants must meet the general eligibility requirements outlined in the "Social Assistance Overview" in this report.

Liquid Assets

Employable clients are not allowed liquid assets at application, but are allowed the following levels after enrolment. Other clients are allowed the following liquid assets at the time of application and after enrolment.

Employable \$400	Other ^a \$1,000
	\$1,000
\$800	\$2,000
\$800 plus \$400 for each dependent child up to a maximum of \$2,000.	\$2,000 plus \$500 for each dependent child up to a maximum of \$3,000.

Earnings Exemptions

Employment and Income Assistance program clients are eligible for the following monthly exemptions on earned income⁸:

Clients without	Clients with	Single Parents	Single Parents with
Disabilities b	Disabilities ^c	without Disabilities	Disabilities
\$100 plus 25% of the	\$100 plus 30% of the	\$115 plus 25% of the	\$115 plus 30% of the
net remainder	net remainder	net remainder	net remainder

a. Earnings exemptions apply to each employed person in the household. The earnings of children who are in full-time attendance at an approved educational institution are totally exempt.

Benefits

Basic assistance consists of a basic allowance and a shelter allowance. The basic allowance covers the cost of food and clothing, as well as personal and household needs. Maximum basic allowance rates are based on the household's composition, as well as the number of children in the household and their ages. Maximum shelter allowance rates are based on the number of persons in the household (including children).

More Information

For more information, please consult the Manitoba Department of Family Services and Housing website at: www.gov.mb.ca/fs/.

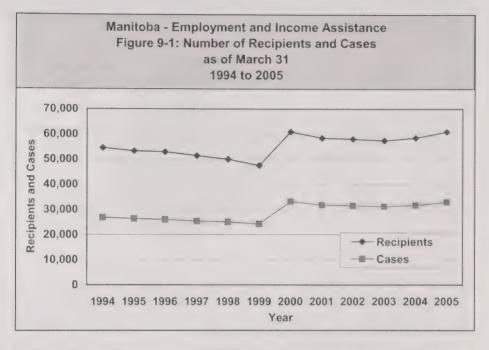

b. Able-bodied employable persons (general assistance)

c. Persons with disabilities and aged persons who are not single parents.

⁸ Applicants and new clients are eligible only for the basic exemption (\$100 or \$115). Clients are eligible for the additional percentage after receiving Employment and Income Assistance for one month.

Chapter 10 - Saskatchewan

Social Assistance Programs

PROGRAM DESCRIPTION

Overview

In Saskatchewan, the provincial social assistance programs are known as the Saskatchewan Assistance Plan (SAP) and the Transitional Employment Allowance (TEA). The Saskatchewan Assistance Act, and the Saskatchewan Assistance Plan. The Saskatchewan Assistance Plan. The Saskatchewan Assistance Act and the Transitional Employment Allowance Regulations govern the Transitional Employment Allowance.

The Saskatchewan Assistance Plan provides basic benefits to adults only. Children's basic benefits are provided through the Saskatchewan Child Benefit (see p. 101).

Service Delivery

The Department of Community Resources and Employment is responsible for the delivery of the Saskatchewan Assistance Plan to adults within the province.

Eligibility

General

In order to be eligible for the Saskatchewan Assistance Plan, applicants must meet the general eligibility requirements outlined in the "Social Assistance Overview" in this report.

Liquid Assets

At the time of application, applicants' liquid assets may not exceed the following allowable limits.

Chapter 10 - Saskatchewan - Social Assistance Programs

Saskatchewan - Liquid Asset Exemptions				
March 2005				
Single	\$1,500			
Family	\$3,000 plus \$500 for each additional dependant			

Earnings Exemptions9

Once an application for assistance has been approved, Saskatchewan Assistance Plan clients are eligible for the following monthly exemptions on earned income:

Saskatchewan - Earnings Exemptions March 2005				
	Clients without Disabilities	Clients with Disabilities		
Single	\$25 plus 20% of the next \$375	\$100 plus 20% of the next \$375		
Childless Couple	\$50 plus 20% of the next \$625	\$125 plus 20% of the next \$625		
Two-Parent Family	\$125	\$200		

Benefits

Basic assistance consists of a basic allowance and a shelter allowance. The basic allowance covers the cost of food, clothing and travel, as well as personal and household items for adults only. Maximum shelter allowance rates are calculated using a three-tier scale based on geographic location and family size¹⁰.

Effective February 2003, a new financial benefit for short-term clients was introduced. The Transitional Employment Allowance is available to clients who have a known date of self-sufficiency (such as a first pay or Employment Insurance), or who are participating in the Jobs First program. The allowance is a flat rate benefit which is payable for a maximum of four months¹¹. The Department of Community Resources and Employment administers the allowance through its client contact centre.

Children's basic benefits are paid through the Saskatchewan Child Benefit.

⁹ These exemptions do not apply to farmers, self-employed clients, or for the first three months on assistance for those Saskatchewan Assistance Plan clients who are capable of full-time work.

Effective April 1, 2005, a four-tier scale is being used.
 Effective April 1, 2005, this limit is no longer in effect.

Saskatchewan Child Benefit

The Saskatchewan Child Benefit (SCB) is a non-taxable amount paid monthly to help low-income families with the cost of raising children under the age of 18 years. The creation of the Saskatchewan Child Benefit in July 1998 effectively removed children's benefits from the social assistance system.

The Canada Revenue Agency delivers the SCB as an integrated payment with the CCTB and the NCB Supplement. The SCB rates are based on family type, net income and number of children. For instance, maximum SCB benefits are paid to those families whose income is less than \$15,921 per year, while two-parent families with two children, whose annual income falls between \$15,921 and \$16,631 per year, are eligible for partial SCB benefits. Single-parent families with two children, whose annual income falls between \$15,921 and \$18,025 per year, are also eligible for partial SCB benefits.

Effective July 2004, in addition to the National Child Benefit Supplement, families with two children may be entitled to receive an SCB benefit of up to \$214 per year. Families with three or more children receive an additional \$291 per year per child. Single parent families may be entitled to an additional amount of up to \$420.

	E	Estimated 1	ewan Child Number of 000 to 2004	Recipients		
	1999-2000	2000-2001	2001-2002	2002-2003	2003-2004 a	2004-2005
Families	36,760	33,070	29,020	26,090	15,260	18,770
Children	75,300	67,820	56,960	53,530	40.070	42.520

a. In 2003-2004, the number of families and children declined due to a large NCB Supplement increase, which reduced the number of families eligible for the Saskatchewan Child Benefit. Futhermore, a large number of families with entitlements of less than \$10 per month, received a lump-sum payment at the beginning of the year rather than monthly payments, so they are not reflected in the statistics.

Saskatchewan Rental Housing Supplement

The Saskatchewan Rental Housing Supplement is designed to help low-income tenant families and people with disabilities access quality affordable housing. The Saskatchewan Rental Housing Supplement took effect in April 2005.

The Saskatchewan Rental Housing Supplement consists of two programs: the Family Rental Housing Supplement and the Disability Rental Housing Supplement.

Chapter 10 - Saskatchewan - Social Assistance Programs

Eligibility for the Family Rental Housing Supplement is based on the number of children in the household; household income; the amount of rent paid; and the rental property meeting minimum health and safety standards.

The Disability Rental Housing Supplement helps with some of the additional costs that people with disabilities have for disability-related housing supports. It is available to people with disabilities that live in rental housing, including single individuals, couples without children, and families.

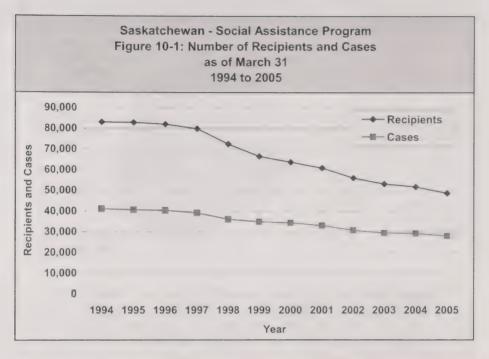

To qualify for the Disability Rental Housing Supplement, applicants must have a disability that restricts their daily activities within the home, and have physical housing supports already in place in the home. Eligibility for the Disability Rental Housing Supplement is further based on household income, the amount of rent paid, and the rental property meeting minimum health and safety standards.

Chapter 11 - Alberta

A - Alberta Works - Income Support

PROGRAM DESCRIPTION

Overview

In Alberta, the provincial social assistance program is known as Alberta Works - Income Support. The *Income and Employment Supports Act* and the Income Supports, Health and Training Benefits Regulations govern the Alberta Works - Income Support program.

Alberta Works provides basic benefits to both adults and children. It includes four components: Employment and Training Services, Income Support, Child Support Services, and Health Benefits.

Alberta Works - Income Support replaced the Supports for Independence program effective April 1, 2004.

Social assistance for persons with severe disabilities is provided through Alberta's Assured Income for the Severely Handicapped program (see p. 121).

Service Delivery

Alberta Human Resources and Employment is responsible for the delivery of the Alberta Works - Income Support program to adults and children within the province.

Eligibility

General

In order to be eligible for Alberta Works - Income Support, applicants must meet the general eligibility requirements outlined in the "Social Assistance Overview" in this report.

Liquid Assets¹²

At the time of application for Alberta Works - Income Support, applicants' liquid assets may not exceed the following allowable limits.

Alberta - Alberta Works - Income Support Cash and Liquid Asset Exemptions March 2005				
Expected to Work a Not Expected to Work a				
Cash and liquid assets of the same value as	Cash and liquid assets of up to twice the			
one month of core benefits. value of one month of core benefits.				
a. See p. 113 for description.				

Earnings Exemptions¹²

Once an application for assistance has been approved, Alberta Works - Income Support clients are eligible for the following monthly exemptions on earned income:

Alberta - Alberta Works - Income Support Earnings Exemptions			
March 2005			
Singles	\$115 per month plus 25% of additional earnings		
Single-Parent Family	\$230 per month plus 25% of additional earnings		
Couples (with or without children)	\$115 per month plus 25% of additional earnings for each working adult		

Benefits

Core benefits consist of a core essential benefit and a core shelter benefit. The core essential benefit covers the cost of food, clothing, household and personal needs, the installation of a telephone, as well as laundry and transportation. The core shelter benefit is for rent and utilities.

The amount of the monthly core benefit depends on family size, the number of adults in the family unit, the ages of the children in the family unit, the family unit's level of employability, and available financial resources.

Alberta Works - Income Support clients are placed in one of three client groups: Expected to Work, Not Expected to Work, or Learners.

¹² These two tables apply to the Expected to Work and the Not Expected to Work client groups only.

Chapter 11 - Alberta - Alberta Works - Income Support

The "Expected to Work" category includes those individuals and families that:

- Are working full-time or part-time, but whose income is less than the financial benefits provided under Alberta Works - Income Support;
- · Are able to work, but unable to find employment; or
- Are temporarily not available for work for a short time due to illness, or the presence of a child under six months of age, fleeing an abusive relationship, etc.

The "Not Expected to Work" category includes those individuals and families that:

- Have a permanent disability as defined by the AISH program, but require benefits that are not provided under the AISH program; or
- Have multiple barriers or suffer from a chronic medical condition that inhibits their ability to seek and accept employment, but are not considered as having a permanent disability as defined by the AISH program.

The "Learners" category includes those individuals and families that are participating in occupational training or attending classes or courses to improve their employability. Tuition, books, supplies, and a living allowance may be provided.

Cases by Reason for Assistance

Alberta - Alberta Works - Income Support
Table 11a-2: Number and Percentage of Cases
by Reason for Assistance
as of March 31, 2005

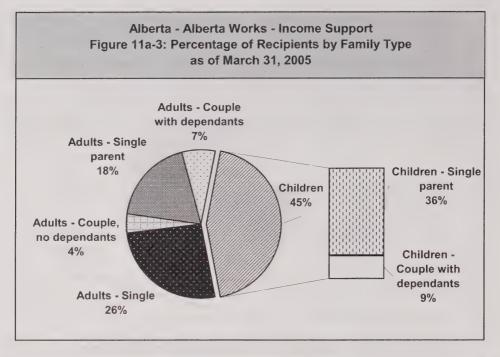

Reason for Assistance	2005	%
Employed	4.400	15%
Unemployed	5,200	18%
Short term disability ^a	7,100	25%
Long term disability b	11,700	42%
Total	28,500	100%

a. "Short-term disability" includes clients whose circumstances make them unavailable for work or training at present, but who will likely be able to return to work in the future. This category includes those with short-term medical problems or family responsibilities, and single persons age 50 years or older, who are unlikely to obtain continuous employment.

Note: Totals may not add due to rounding.

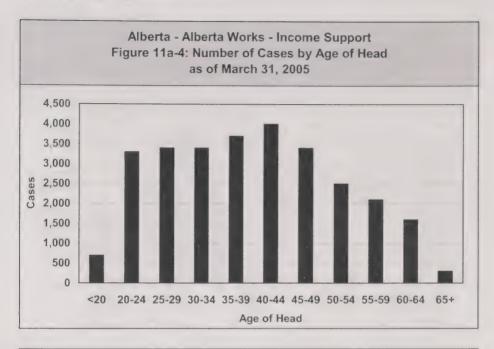

b. "Long-term disability" includes clients who may never be able to return to full time work in the labour force. Often these clients suffer from multiple barriers, such as a combination of medical impairment, lack of education, and poor work history. This category may include AISH clients who have been transferred to the Alberta Works - Income Support program to access supplemental benefits which are not available through AISH.

Recipients by Family Type

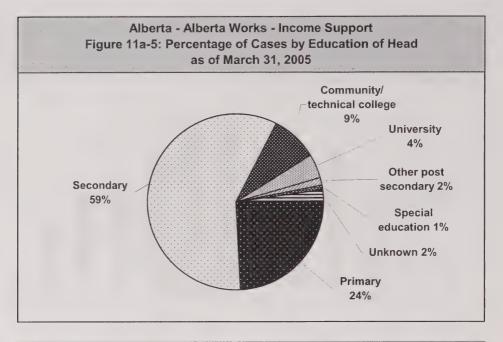

Alberta - Alberta Works - Income Support Table 11a-3: Number and Percentage of Recipients by Family Type as of March 31, 2005

B - Assured Income for the Severely Handicapped

PROGRAM DESCRIPTION

Overview

In Alberta, the provincial income assistance for adults with a severe and permanent disability is known as Assured Income for the Severely Handicapped (AISH). The Assured Income for the Severely Handicapped Act, the Assured Income for the Severely Handicapped Regulation, the Income and Employment Supports Act, and the Facilities, Institutions, Health Benefits Regulation govern Alberta's AISH program.

AISH provides financial benefits to adults with a permanent disability that severely impairs their ability to earn a livelihood. Health benefits are provided to the AISH recipient, his/her spouse/cohabitating partner, and dependent children.

Service Delivery

Alberta Seniors and Community Supports is responsible for the delivery of AISH throughout the province.

Eligibility

General

In order to be eligible for the Assured Income for the Severely Handicapped program, applicants must meet the general eligibility criteria for severe handicap, age, residence, assets, and income.

Assets

AISH applicants/recipients and their spouses/cohabitating partners may not have assets exceeding \$100,000. Assets considered part of the \$100,000 limit include cash or cash equivalent assets, investments, and business/farm or other property. Assets not included in the \$100,000 limit are the house where the applicant/recipient resides, a vehicle plus an adapted vehicle, insurance payments for damages or stolen goods, special compensation

payments, assets held in a discretionary trust, and locked-in retirement accounts.

Income Exemptions

The level of benefits that a recipient receives from AISH depends on the type and amount of income of the recipient and his/her spouse/cohabitating partner. Under AISH, income is classified into three categories: fully exempt, partially exempt (e.g. employment, interest/investment, rental income), and non-exempt.

The amount of income that is partially exempt varies depending on the composition of the household. The following are examples of monthly income exemptions on partially exempt income:

Alberta - Assured Income for the Severely Handicapped Partial Income Exemptions March 2005		
Single Person, Childless Couple (both AISH)	\$200 plus 25% of the net remainder.	
Single Parent, \$775 plus 25% of the net remainder. Childless Couple (one AISH), Couple with Children (both AISH) ^a		
a. Only one AISH recipient qualifies for this exemption. The other AISH client qualifies as a single person.		

Benefits

Assured Income for the Severely Handicapped provides a monthly financial benefit and health benefits.

The health benefits available to the recipient, his/her spouse/cohabitating partner, and dependent children under the age of 18 years who reside with the recipient include prescription drugs, optical, dental, emergency ambulance, and essential diabetic supplies. AISH recipients also receive premium-free Alberta Health Care Insurance, and an exemption of the Alberta Aids to Daily Living (AADL) cost-share portion.

AISH has one sub-program called Modified AISH. Modified AISH is for recipients who live in facilities designated by the Facilities, Institutions, Health Benefits Regulation. Benefits include the facility daily accommodation rate, plus a living allowance of up to \$175 per month.

AISH recipients who have Canada Pension Plan Disability income, or who become employed and earn enough income to make them ineligible for AISH, may be eligible for the Alberta Adult Health Benefit, which provides the same

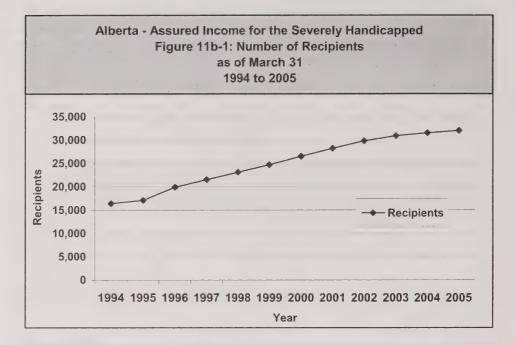

health benefits received by AISH recipients. Rapid reinstatement of AISH benefits is also available for those eligible former AISH recipients who lose their employment.

More Information

For more information, please consult the Alberta Seniors and Community Supports website at: www.seniors.gov.ab.ca/aish.

STATISTICS

Recipients

	Alberta - As	able 11b-1:	Number of	Recipients		
as of March 31 1994 to 2005						
	1994	1995	1996	1997	1998	1999

Chapter 12 - British Columbia

Employment and Assistance

PROGRAM DESCRIPTION

Overview

In British Columbia, the provincial social assistance program is known as Employment and Assistance (BCEA). The British Columbia Employment and Assistance for Persons with Disabilities Act, the British Columbia Employment and Assistance Regulations, and the British Columbia Employment and Assistance for Persons with Disabilities Regulations govern British Columbia's Employment and Assistance program.

Employment and Assistance provides basic support and shelter benefits to family units. Children's basic support benefits are provided separately through the British Columbia Family Bonus¹³ (see p.133).

Service Delivery

The Ministry of Human Resources¹⁴ is responsible for the delivery of Employment and Assistance to adults within the province.

Eligibility

General

In order to be eligible for Employment and Assistance, applicants must meet the general eligibility requirements outlined in the "Social Assistance Overview" in this report.

¹⁴ The Ministry of Human Resources was renamed the Ministry of Employment and Income Assistance effective June 2005.

¹³ Children aged 18 years living in a family receiving social assistance are paid a support allowance equivalent to the British Columbia Family Bonus (BCFB) For the purpose of British Columbia Employment and Assistance, children are defined as persons less than 19 years of age, while the BCFB is paid only for children under 18 years of age.

Chapter 12 - British Columbia - Employment and Assistance

Prior to applying for Employment and Assistance, all adults in the family unit must complete an applicant orientation program and prior to their application interview, complete a reasonable work search in the three-week period. There are six exemptions to the work search requirement. In addition, at least one person in the family unit must demonstrate that they have received remuneration for at least 840 hours of paid employment, or earned at least \$7,000 in gross employment income in each of any two consecutive years prior to applying for assistance. There are 16 exemptions to this requirement in order to avoid hardship.

Liquid Assets

At the time of application for Employment and Assistance, applicants' liquid assets may not exceed the following allowable limits.

British Columbia - Liquid Asset Exemptions			
March 2005			
	Clients without Disabilities ^a	Clients with Disabilities	
Single	\$1,500	\$3,000	
Single-Parent Family	\$2,500	\$5,000	
Childless Couple	\$2,500	\$5,000	
Two-Parent Family	\$2,500	\$5,000	
a. The amount of cash assets families.	may not exceed one month of social assista	ance plus \$150 for single or \$250 for	

Earnings Exemptions

Employment and Assistance clients are eligible for the following monthly exemptions on earned income following three months on assistance:

British Columbia - Earnings Exemptions March 2005	
Employable Persons	\$0
Persons with Persistent Multiple Barriers	\$300
Persons with Disabilities	\$400
Single parents with a disabled child	\$300

Benefits15

Basic assistance consists of a support allowance and a shelter allowance. The support allowance covers the cost of food, clothing, personal and household items. Maximum support allowance rates are based on the composition of the family unit and the age or marital status of the applicant. Maximum shelter allowance rates are based on the composition of the unit, as well as the age and disability status of the applicant.

Employment and Assistance has three rates schedules: Income Assistance, Disability Assistance, and Hardship Assistance. Income Assistance rates apply to two separate groups of clients across a range of family types. One group is classed as employable and these clients receive an assistance rate that is based on a temporary need for assistance. The other group consists of clients with persistent multiple barriers to employment (PPMB) and their rate is higher than employable clients since they typically require income assistance over a longer time period. Disability Assistance rates apply to unattached individuals and families that include persons aged 18 years and older who have a severe and confirmed mental or physical impairment that restricts their ability to perform daily living activities. Hardship Assistance rates apply to those persons requiring temporary financial assistance on a month-to-month basis who are not eligible for income or disability assistance for a number of specific reasons.

British Columbia Family Bonus

The British Columbia Family Bonus (BCFB) is a non-taxable amount paid monthly to help low-income families with the cost of raising children under the age of 18 years. The creation of the British Columbia Family Bonus, in July 1996, effectively removed children's support benefits, but not shelter benefits, from the social assistance system.

The Canada Revenue Agency delivers the BCFB as an integrated payment with the CCTB and the NCB Supplement. The BCFB rates are based on net income and number of children. For instance, maximum combined benefits from the NCB Supplement and the British Columbia Family Bonus benefits are paid to those families whose income is less than \$20,500 per year.

¹⁵ Effective April 1, 2002, social assistance for singles and childless couples is limited to two years out of every five. This limit is waived for recipients in compliance with their employment obligations under an Employment Plan, as well as under many other conditions.

Chapter 12 - British Columbia - Employment and Assistance

Effective July 2004, families with two children may be entitled to receive a BCFB benefit of up to \$142.92 per year. For the third and each additional child, an additional \$104.04 per year may be available.

Since July 2004, the NCB Supplement increases have been fully offset from the BCFB.

The BCFB portion for families with net income below \$20,500 was eliminated for the first child in July 2004. This change resulted in a decrease in recipients as shown in the 2004-2005 period in the table below.

British Columbia Family Bonus (including BC Earned Income Benefit) ^a Estimated Number of Recipients 1997-1998 to 2004-2005					
	1997-1998	1998-1999	1999-2000	2000-2001	
Families	209,780	207,830	211,533	205,286	
Children	388,474	384,869	384,191	370,253	
	2001-2002	2002-2003	2003-2004	2004-2005	
Families	204,000	194,000	203,700	151,620	
Children	364,433	368,637	348,390	259,320	

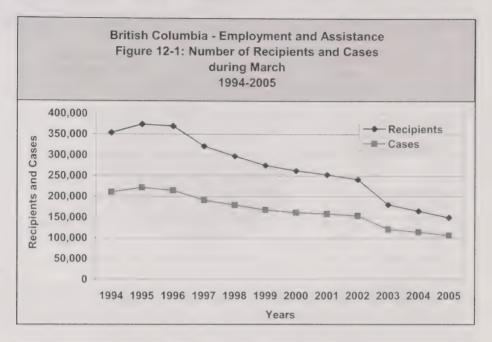

a. The BC Earned Income Benefit (BCEIB) was introduced in July 1998 as an additional incentive for low-income families to seek work and remain employed. The BCEIB pays an additional monthly amount based upon the earned income that a family receives from working.

More Information

For more information, please consult the British Columbia Ministry of Employment and Income Assistance website at: www.eia.gov.bc.ca.

STATISTICS

Recipients and Cases

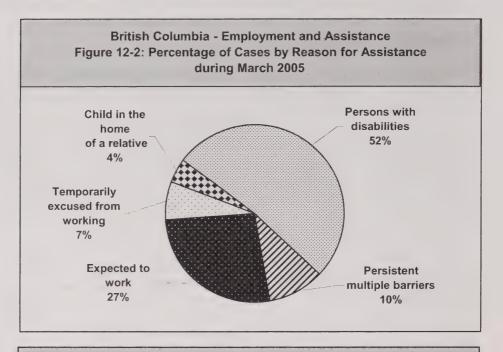

British Columbia - Employment and Assistance Table 12-1: Number of Recipients and Cases during March 1994 to 2005 ^{a,b,c}						
	1994	1995	1996 ^d	1997	1998	1999

0-3 months	6,200	1,400	3.600	11,300
4-6 months	4,000	1,500	3,000	8,500
7-12 months	3,200	3,000	3,300	9,500
13-24 months	3,000	5,800	4.500	13.200
25+ months	5,200	43.700	15 400	64.200
Total	21,600	55,400	29,800	106,800

a. "Duration of Assistance" measures length of current spell only.

Note: Totals may not added due to rounding.

b. "Employable" includes cases that are expected to work.

c. "Disability" includes cases with persons with disabilities.

d. "Other" includes children living in the home of relatives, cases with persistent multiple barriers and cases temporarily excused from working.

Chapter 13 - Yukon

Social Assistance

PROGRAM DESCRIPTION

Overview

In the Yukon, the territorial social assistance program is known as Social Assistance (SA). The *Social Assistance Act* and the Social Assistance Regulations govern the Yukon's Social Assistance program.

The Social Assistance program provides basic benefits and Supplementary Benefits to both eligible adults and children.

Service Delivery

The Department of Health and Social Services is responsible for the delivery of the Social Assistance program to adults and children within the territory.

Eligibility

General

In order to be eligible for the Social Assistance program, applicants must meet the general eligibility requirements outlined in the "Social Assistance Overview" in this report.

Liquid Assets

At the time of application, applicants' liquid assets may not exceed the following allowable limits.

Chapter 13 - Yukon - Social Assistance

Yukon - Liquid Asset Exemptions March 2005			
Clients without Disabilities Clients with Disabilities			
Single	\$500	\$1,500	
Family	\$1,000 (for a family unit of 2) plus \$300 for each additional dependant.	\$2,500 (2 or more persons)	
		An additional exemption up to \$1,500 for each person deemed permanently excluded from the labour force or a single parent or a dependent child under the age of 19 where such an amount has been placed irrevocably in trust for his or their future funeral or burial expenses or education.	

Earnings Exemptions¹⁶

Once an application for assistance has been approved, Social Assistance clients are eligible for the following monthly exemptions on earned income:

Yukon - Earnings Exemptions				
	March 2005			
Single	\$100 of all income plus 25% of earned income.			
Family	\$150 of all income plus 25% of earned income.			

Benefits

Basic assistance consists of a basic allowance and a shelter allowance. The basic allowance covers the cost of food, clothing, and personal and household items. The maximum basic assistance rates are based on the household's size, its composition, and its geographical location. Maximum shelter allowance rates are based on the number of persons in the household (including children) to a maximum amount.

More Information

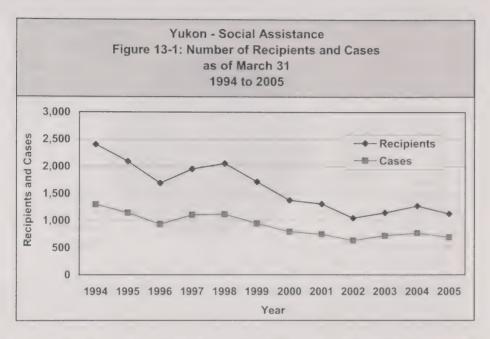

For more information, please consult the Yukon's Department of Health and Social Services website at: www.hss.gov.yk.ca/.

 $^{^{16}}$ 25% of monthly income from employment or self-employment is also exempt after the third month on assistance.

¹⁷ The amount of financial assistance that a family is entitled to receive is linked to a three-tier scale based on location. Tier 1 encompasses Whitehorse, while Tiers 2 and 3 include Dawson City, Mayo, Carcross, Carmacks, and Old Crow.

Chapter 14 - Northwest Territories

Income Assistance

PROGRAM DESCRIPTION

Overview

In the Northwest Territories, the territorial social assistance program is known as Income Assistance (IA). The *Social Assistance Act* and the Social Assistance Regulations govern the Northwest Territories' Income Assistance program.

The Income Assistance program provides basic and enhanced benefits to both adults and children.

Service Delivery

The Department of Education, Culture, and Employment is responsible for the delivery of the Income Assistance program to adults and children within the territory.

Eligibility

General

In order to be eligible for the Income Assistance program, applicants must meet the general eligibility requirements outlined in the "Social Assistance Overview" in this report.

Assets

At the time of application, applicants' current assets may not exceed the following allowable limits. Persons with disabilities are entitled to retain \$5,000. Aged persons are also entitled to retain \$5,000. For all other applicants, all assets are reviewed and may be included in the calculation of eligibility.

Earnings Exemptions

Once an application for assistance has been approved, Income Assistance clients are eligible for the following monthly exemptions on earned income:

Northwest Territories - Earnings Exemptions March 2005						
	Clients without Disabilities	Clients with Disabilities				
Single	\$200	\$200				
Family	\$400	\$400				

Benefits

Basic assistance consists of allowances for food, room and board or accommodations, utilities and fuel. The basic allowance rates are based on the family's size and its geographical location. Room and board or accommodation allowance rates are based on an applicant's eligibility, family size and what is available in the community. The actual amount of fuel and utilities is paid.

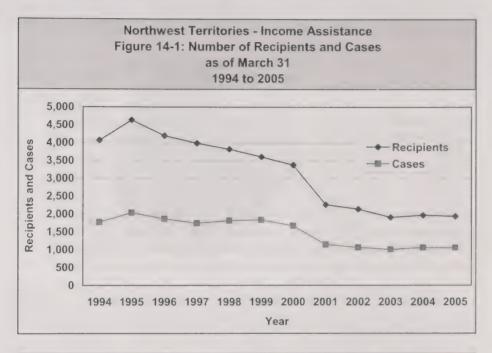

An enhanced benefit is also available for persons with disabilities, seniors and to applicants who participate in a program, such as employment or volunteering. The enhanced benefit provides allowances for clothing, furnishings, security deposits, emergencies and day care.

More Information

For more information, please consult the Northwest Territories' Department of Education, Culture, and Employment website at: www.ece.gov.nt.ca.

Chapter 15 - Nunavut

Income Support

PROGRAM DESCRIPTION

Overview

In Nunavut, the territorial social assistance program is known as Income Support. The *Social Assistance Act* and the Social Assistance Regulations govern Nunavut's Income Support program.

The Income Support program provides basic and extended benefits to eligible heads of households and their dependants.

Service Delivery

The Department of Education is responsible for the delivery of the Income Support program within the territory.

Eligibility

General

In order to be eligible for the Income Support program, applicants must meet the general eligibility requirements outlined in the "Social Assistance Overview" in this report.

Assets

At the time of application, applicants' assets may not exceed the following allowable limits. Persons with disabilities are entitled to retain \$5,000. Aged persons are also entitled to retain \$5,000.

Earnings Exemptions

Once an application for assistance has been approved, Income Support clients are eligible for the following monthly exemptions on earned income:

Nunavut - Earnings Exemptions March 2005						
	Clients without Disabilities	Clients with Disabilities				
Single	\$200	\$200				
Family	\$400	\$400				

Benefits

Income Support consists of basic benefits and extended benefits. The basic benefits cover the cost of food, shelter, and utilities. The food allowance component of basic benefits may be used to purchase personal and/or household items. Maximum shelter allowance rates depend on the composition of the household: single-person or including dependants. The actual amount of fuel and utilities is paid.

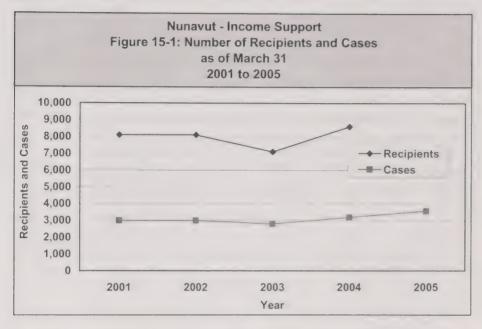

An extended benefit is also available for persons with disabilities, seniors and to applicants who participate in a program, such as employment or volunteering. The extended benefit provides allowances for clothing, furnishings, security deposits, emergencies and day care.

More Information

For more information, please consult Nunavut's Department of Education, website at: www.gov.nu.ca/education/eng/.
